ESDN Conference 2015, 9 October, Session 4: Governance architecture and strategic frameworks for the 2030 Agenda implementation at the national level

National Implementation of the UN 2030 Agenda within the Framework of the German National Sustainable Development Strategy

Sophie Stützel

Federal Chancellery, Division „Sustainable Development“

2. Key Challenges

- Reflect universality of SDGs in national targets and indicators

Target will be achieved or nearly achieved (16)

Development in the right direction, but gap between 5 and 20 % will remain (6)

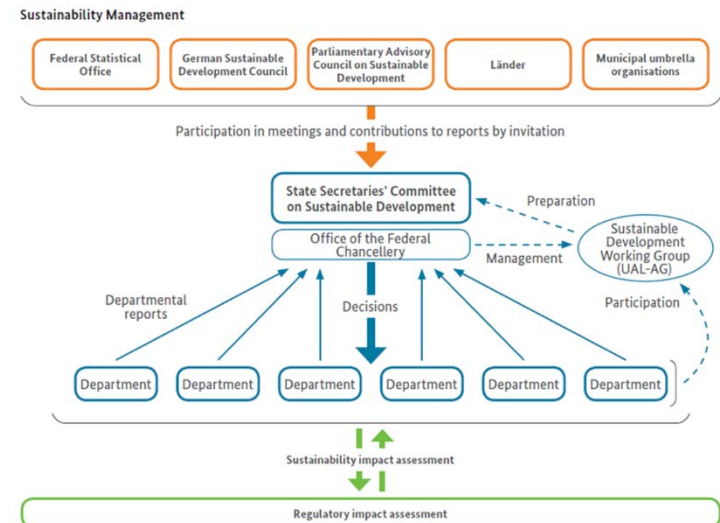

Development in the right direction, but gap of more than 20 % will remain (10)

Development in the wrong direction (6)

- Make sustainability governance fit for

- multi-stakeholder involvement
- international reporting
- effective steering of implementation

3. Support from EU-level

- New strategic and ambitious approach for a European Sustainable Development Strategy as impuls for member states
- Facilitation of exchange about implementation between member states and other relevant stakeholders (best practices, challenges)
- Strong player on regional level in follow-up and review process (e.g. peer learning, voluntary review etc.)

Government Declaration, 24 September 2015

- Government committed to ambitious implementation of the 2030 Agenda
- NSDS will determine how national targets, indicators and actions contribute to the SDGs
- Germany will present its implementation efforts at HLPF 2016
